

GTS SpamShield

- Dramatically Less Junk Mail
- Safer Clicks
- Real Protection for Your Business

Slash the Junk and Block Modern Email Scams

“The fastest way into your business isn’t the front door — it’s your inbox.”

Email remains the #1 way criminals break into small and mid-sized companies. One fake invoice... one urgent request... one wrong click — and a business can face a hit that could jeopardize its future.

GTS SpamShield acts as your inbox’s security guard. It cuts junk, stops dangerous messages normal filters miss, and gives your team a simple button to report anything suspicious.

Behind that button is AI and global intelligence protecting over 15,000 businesses. It learns your company’s communication patterns, spots fakes, and removes dangerous emails from every inbox.

Why Business Owners Trust GTS SpamShield

Less Junk, Fewer Scams

Blocks fake invoices, scare emails, impersonation attempts, and new AI-driven threats.

One-Click Safety

If something looks wrong, employees hit Report. We investigate and the system removes it everywhere.

No Extra Effort

Runs inside Microsoft 365/Google Workspace with no new apps or training.

Strong Protection, Simple Setup

Powered by AI trusted by 15,000+ companies, without enterprise complexity.
