ABOUT PAUL

IT should support your business operations and increase revenue — not distract from your business. Grand

Technology Solutions helps organizations reduce risk, stabilize their systems, and implement secure, scalable technology. From managed IT services and Microsoft 365 to cybersecurity, backups, and compliance readiness, we build environments that are reliable and defensible. Most businesses operate with hidden exposure: weak security controls, inconsistent backups, outdated infrastructure, and reactive support. Our role is to remove that uncertainty and provide structured, accountable IT management.

When technology is stable and secure, leadership can focus on growth instead of troubleshooting.

PHRASES TO LISTEN FOR

- We just moved to Microsoft 365.
- We had a security scare.
- We're growing and our systems are disorganized.
- We're not sure our backups are working.
- We need compliance or security guidance.
- We don't have a long-term IT strategy.
- We need someone proactive instead of reactive.

helpgts.com

AFTER WE DISCUSSED MY NEEDS, GTS WAS ABLE TO CONFIRM A LOT OF WHAT I THOUGHT WOULD MAKE SENSE, AND THEY MADE SOME VERY GOOD, COST-EFFECTIVE RECOMMENDATIONS. WE NOW HAVE A LOCAL ENVIRONMENT THAT WE CAN REMOTE INTO, REDUNDANT BACKUPS, ENHANCED SECURITY AND MONITORING BY AN OUTSIDE PROFESSIONAL (GTS, OF COURSE!)”

— Dennis Povloski, DF Pensions, Inc.

TOP CUSTOMERS

- Small businesses (2–50 FTEs)
- Professional services firms (CPAs, attorneys, consultants)
- Nonprofits and associations
- Healthcare and regulated organizations
- Construction, Trade, and field-service companies
- Multi-location businesses
- Organizations transitioning to Microsoft 365 and cloud platforms
- Companies concerned about cybersecurity, compliance, and business continuity
